THE COMPANY

Environmental Safety Solutions was started with one goal in mind "Be the Best." We as a company are managed by retired Firefighter Paramedics and EMT's that have over 40 years of combined experience in servicing the community in times of need. We quickly put our skills to the test and began to gain work through reputation. The safety of your employees holds the utmost importance. Let Environmental Safety Solutions Confined Space Rescue Services keep it that way with trained emergency medical technicians (EMT's), top-notch rescue equipment, and decades of knowledge and experience. Our areas of expertise are as follows:

- **Confined Space Rescue**
- **Emergency Medical Technicians (EMT's)**
- **Personal Protective Equipment (PPE)**
- **Medical Equipment & First Aid**
- **Drug Testing**
- **Safety Rental Equipment**
- **Gas Detection**
- **Safety Consulting**

RENTAL EQUIPMENT

Oil fields support our focus in providing a quality product to the workforce. Our rental fleet is maintained at the highest level of care and service. Our service technicians are on call 24hrs a day 7 days a week and are fully prepared to handle any need that may arise.

AIR TRAILERS: Hazardous atmospheres are an unfortunate workplace obstacle. Mobile breathing air trailers are a significant part of any maintenance or emergency operation. Our Air Trailers provide CGA Grade "D" breathing and have all KEY features industry professional's demand. Our trailers come equipped with six cylinders and six quick-connection points for any situation. ESS Oilfield Support offers solutions to any atmospheric condition that might be present.

- 6 – 2500 Cylinder Cascade System
- 6-Person quick-connection points
- Integrated Low Alarm

COOLING TRAILERS: Our Cooling trailer systems utilize a 36" high powered cooling fan, a water tank, a pop-up shade tent, an ice chest and a generator on a single trailer. Our cooling station design allows you to place it anywhere (no water or power supply needed) and still provide workers in the field relief from the heat.

EYE WASH TRAILERS: Built from the ground up by ESS, these trailers comply with all ANSI standards for drenching eyes and the body to remove all contaminants. Our self-contained portable eyewash/shower trailers are the intrinsically safe/explosion proof solution for all types of hazardous locations without the need for a plumbed water supply. Built from the ground up by ESS, these trailers comply with all ANSI standards, for drenching the eyes and body to remove all contaminants.

GAS DETECTION

At Environmental Safety Solutions Oil Field Support our gas detection and defense team, monitors, and services multiple industries in many different applications. From oil & gas, agriculture, waste management, to water & processing plants. With gas detection we do not limit ourselves to one way of thinking. We have a wide variety of monitoring techniques such as TRU wireless gas detection systems, fixed gas detection systems, standalone area monitoring, & portable gas detection monitoring systems. Our team is fully trained and capable of calibrating, serving & repairing all types of gas detection systems and personal monitors. We do not only detect poison gasses, but we assist our customers in the defense and dissipation of them to ensure a safe work site. As a company we are fully outfitted for all areas of gas detection and defense. With safety and customer service in mind we are constantly striving for and developing new and more efficient ways to protect the industries and customers we service.

- Now we offer 6 Watt UHF/VHF, 9000MHz, and 2.4GHz Meshing.
- Flexible sensor placement -a line of sight not required
- Communicates with stationary and portable RTU's
- Offers additional analog inputs and discrete.
- Built-in battery – works with 12/24 VDC, 115/230 VAC, or Solar
- Scalable system – expands for future applications
- Compatible with DCS systems using standard Modbus-RTU Protocol
- Integrates easily with SAFER Systems Software

SAFETY CONULSTING

The world of safety is ever-changing in our country, regardless of which industry your company finds itself in at ESS, we pride ourselves in our ability to adapt and grow with and beyond the regulations established by government-established entities. Our consultants' function in much of the same capacity as an EHS Manager or a Senior Safety Admin would, in which they specialize in facilitating the creation, implementation, and routine revision of individualized EHS programs and management plans for your company. They can act as field support for your current operations, support your operations through the creation of policies and procedures, and implement management programs for Short Service Employee (SSE) processing or 2nd and 3rd party contractors, while interfacing with current regulation databases. We at ESS can easily provide your company with safety and environmental regulation assistance with our complete range of EPA, OSHA, and DOT-compliant programs, training, and policy development plans. From in office training to boot on ground field safety support, ESS consultants are always available to answer the biggest problems for your company's safety needs.
